### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter Costas on May 26, 2005.

### IN THE CLAIMS

Claim 1, line 3, --selectable-- has been inserted before "bending".

line 11, --selectable-- has been inserted before "bending".

line 12, --selectively-- has been inserted before "made".

Claim 10, line 6, --selectable-- has been inserted before "bending".

line 8, "a", second occurrence, has been deleted.

line 15, --selectable-- has been inserted before "bending".

line 16, --selectively-- has been inserted before "made".

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: One reason for allowance is that the claimed bending apparatus *inter alia* includes a swivelable bending tool in the form of a bending cheek that swivels about a swivel axis that runs in the direction of the

Art Unit: 3725

bending line of the workpiece with the bending tool comprised of a multiplicity of segments with at least some of which can be selectively connected to the bending tool drive. Kutschker (5,627,135), which shows a bending tool of the kind claimed and includes a bending cheek made up of a multiplicity of segments 44, 54 that can be positioned into and out of operative contact with the workpiece 20. However, Kutschker does not show that the segments can be "selectively connected" to the bending tool drive 30. While MacGregor (5,067,340) shows that the bending tool segments 36 can be selectively connected to the bending tool drive, the bending tool is not swivelable about an axis running in the direction of the bending line of the workpiece. As to Folwell (GB 2,032,308), Folwell's segments 38 can be removed and attached to the tool drive 26 and, thus, are "selectively connected" to the tool drive. However, Folwell does not show a "selectable" tool drive where the "drive connection is selectively made to produce the bending action on the workpiece".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
